

MODEL PK-VKKIT VIBRATING SEALANT CUTOUT TOOL

Model PK-VKREPL

Model PK-VKKIT

The Vibrating Knife Cutout Kit provides the contractor with everything needed to complete simple or complex cutout jobs. The newly designed Rockwell tool uses Microsonic technology to create a high frequency oscillation motion providing a high-speed and smooth motion to cut and remove sealant.

The Kit includes the most popular cutout blades and specially designed inserts which allow the blades to be used on multiple vibrating knife tools. Additional tools include the handy 9" cutout knife, 5 unbreakable utility blades and a 20-piece multi-purpose accessory kit.
